Edgile + Wipro: CyberSecurity by CyberSecurists

Modernize with holistic cybersecurity defense
and risk management

Get started

The reality

Energy and utilities leaders are navigating the biggest industry shifts since the advent of the power grid. As big data and AI bring new insights, existing security programs need to be updated in order to secure access to disparate systems and to ensure data integrity. This is vital in light of increasingly sophisticated cybersecurity threats.

Introducing Edgile + Wipro >

66%
of respondents
will invest more in cybersecurity in 2023 compared with 2022[1]

[1] "2023 CIO Agenda Insights for Oil & Gas Industry," Gartner, 2022.

Edgile + Wipro offer end-to-end enterprise security services designed to secure the environment and help you optimize security costs and operations.

Here's how they can help ⟩

What challenge can Edgile + Wipro help you solve?

Protecting disparate systems in isolation is no longer an effective security strategy

Get protection for your entire organization and help with implementing a Zero Trust security model.

Meet Jerrod

Chief Technology Officer

Challenge

Protecting disparate systems in isolation is no longer an effective security strategy

Jerrod has led initiatives to secure business through huge implementations to bring on technologies like IoT and AI capabilities that will support sustainable business growth. Last year, the industry experienced an alarming number of cybersecurity attacks, and he knows it's not a matter of if, but when their company will be targeted. He needs help implementing a comprehensive Zero Trust security model.

What's the insight? >

Challenge • Insight • Solution

Today's existing security programs aren't equipped to protect you tomorrow

See the solution >

At the current rate of growth, **damage from cyberattacks will amount to about**

$10.5T

annually by 2025[2]

Meet Leigha

Director of Digital Transformation

Safeguarding your business against increasingly sophisticated cybersecurity threats

Leigha is leading her organization through large infrastructure modernizations, clean-energy integrations, AI transformations, and beyond. As they modernize, she knows that protecting the business against ever more sophisticated cybersecurity threats is a priority. She needs a solution that offers end-to-end security and optimizes security costs and operations.

What's the insight? >

Challenge — Insight — Solution

A successful digital transformation requires a holistic, cost-effective security strategy

See the solution ›

Global cybersecurity spending will exceed

$1.75T

from 2021 to 2025[2]

Challenge — Insight — Solution

Solution

Edgile + Wipro offer end-to-end enterprise security services

These new services are designed to secure the organization's environment and help optimize security costs and operations. Plus, Leigha's company leveraged pre-packaged Quick Starts to address the most critical near-term findings, so she's confident the business is secure ahead of the next modernization.
